PROFESSIONAL SUMMARY

MERN Full Stack Developer with **2+ years** of experience building scalable web applications using **React.js, Next.js, Node.js, Express.js, and MongoDB**. Skilled in **REST APIs, GraphQL, Socket.IO**, Redis, Authentication, and AI-powered applications using OpenRouter and VAPI AI. Experienced with **Docker, Kubernetes**, and modern deployment workflows.

SKILLS

FRONTEND: React.js | Next.js | JavaScript | TypeScript | HTML5 | CSS3 | Tailwind CSS

BACKEND: Node.js | Express.js

UI COMPONENT LIBRARIES: Material UI | ShadCN UI

APIs & REAL-TIME: REST APIs | Socket.IO | GraphQL

DATABASE & CACHING: MongoDB | Redis

DEVOPS & CONTAINERIZATION: AWS (EC2, S3, SES) | Docker | Kubernetes

TOOLS: Git | GitHub | Redux | VAPI AI | OpenRouter

PROFESSIONAL EXPERIENCE

DEALDOX — MERN Full Stack Developer

May 2024 – Present | Bangalore, India

- Developed **pricing and payment modules** using **Razorpay** with subscription plans and implemented **Socket.IO-based real-time updates**, improving **onboarding efficiency by 30%** and enhancing **user engagement**.
- Integrated multiple **CRMs** including **Salesforce, LeadSquared (LSQ), and HubSpot** using **MVC architecture**, reducing **manual workflow effort by 40%** and improving **data synchronization reliability**.
- Built a **Logger and User Activity Tracking system** using **Winston, Socket.IO, and AWS S3**, enabling **100% traceability** of critical user actions and reducing **issue investigation time by 50%**.
- Improved **UI performance by 40%** using **Web Workers** for heavy data processing, significantly reducing **UI lag** and enhancing **application responsiveness**.
- Contributed to **scalable backend architecture** for **dynamic database provisioning** under a common domain while optimizing **API payloads**, reducing **average response times by 25%**.
- Worked extensively on the core **Rules Engine** functionality in the **CPQ product**, implementing **guided selling workflows** and **dynamic conditional rendering**, improving **product configuration efficiency** for business users.
- Implemented **Nodemailer** with **AWS SES** for **automated email triggers**, enabling **scalable notification workflows** with **99% email delivery reliability**.

PROJECTS

AI Interview Platform

MAY 2026

Tech Stack: Next.js 16, **TypeScript**, GraphQL, Redis, OpenRouter, VAPI AI, MongoDB, Tailwind CSS, ShadCN UI, Firebase, Zod, JWT (Access & Refresh Tokens), Vercel, Docker, Kubernetes

- Built a production-level **AI-powered interview preparation platform** with **mock voice interviews, AI-generated questions**, resume analysis, and interview feedback generation using **OpenRouter and VAPI AI**.
- Implemented **GraphQL APIs, Redis caching & rate limiting**, JWT authentication, **Google OAuth**, and deployed the application on Vercel using a custom domain setup.
- Containerized the application using **Docker** and managed deployments using **Kubernetes** for scalable and consistent environments.

Real-Time Chat Application — Tea Kadai Talks

DEC 2025

Tech Stack: MERN, **Socket.IO**, Redux, Material UI, Multer, **AWS EC2, NGINX**, MongoDB, JWT, Vercel

- Built a real-time chat application using the MERN stack and Socket.IO with secure authentication, **one-to-one chats, group messaging**, notifications, profile customization, and light/dark themes.
- Deployed the application using **AWS EC2, NGINX**, and Vercel while implementing **scalable real-time communication** and optimized user experience.

EDUCATION

Bachelor of Computer Applications (BCA)

2020–2023 | 82%

Acharya Institute of Graduate Studies | Bangalore City University .
